

Compagnia del Fiore d'Argento is a cultural-sport Association born by the fusion of two different groups - *Compagnia degli Arcieri del Fiore d'Argento* and *Compagnia di S.Procolo* - but with a common interest: **the historical re-enacting.**

Common goal to all the associates is to develop an accurate, reliable and filological level of historical re-enacting.

Through a continuing research of written and iconographic documentations, the Association has built an accurate and reliable archive, full of images and texts, which brought us to an almost precise level of historical re-enacting, as well as the collaboration with some accredited historians and museums.

Actually the Association is re-enacting two historical periods: **Medieval** and **Celtic**.

Medieval: our re-enacted period is focused at the end of XIV century and the beginning of XV century, most exactly the years between 1380 and 1420, by following the period styles and fashions of the civil clothes, the military clothing and the defensive and offensive armaments of the bolognese and North Italian territory.

Celtic: following a precise territorial refer to our region, Emilia Romagna, we re-enact the "**Galli Boii**" celtic tribe, lived between the 300 and 200 b.C.

Our targets are to deepen our knowledge on the re-enacted historical periods and to supply us with as accurate as possible personal gears; this to enhance our territory history by rappresenting and approaching it to the people, recovering at the meantime an historical and cultural patrimony that is getting lost.

All of this by always following the strictness and the historical coerence which allows us, as happened in the past, to work in historical movies and documentaries, and to create collaborations among all the associates with the aim to do all of these things having fun.

Our Association is able to enliven in historical costume, with a wide choice: **parades, duels, archery shows, military camps** and **Living History**.

It's able also to lead conferences and didactic demonstrations for every instruction level, from the primary school till the university; It can organize **stages of archery practise, medieval fencing** and **artisan activities**.

The Association can provide historical consulence for medieval events, for finding and enlistment of historical groups of every nationality and re-enacted periods, with the goal to organize an historical and culturally accredited re-enacting event, without increasing the local organization efforts.
